- d. It's corrosion-resistant

Question 6

Causing movement in the opposite direction

Select one:

- a. Cycle
- b. Reverse
- c. Put
- d. Rotate

reading

Imagine telling Einstein to stop studying physics. Could people stop doing things they love? This is what people tried to do to Sophie Germain.

Sophie's love was mathematics. She fell in love with it when she was only 13 years old. She found a book about Archimedes and his love of geometry in her father's library. Then she read all the books about math she could find and decided to become a mathematician.

There were two problems. First she was born in eighteenth-century France. Second, she was a girl from a middle-class family. It was very unusual for a girl to study in the early eighteenth century in France.

Sophie's parents wanted her to be like other girls. When she studied mathematics, they tried to stop her. Sophie didn't want to stop. She studied secretly at night, by candlelight, when her parents slept. Her parents found out and took away her candles. That didn't stop Sophie. Finally her parents decided to let her study.

Question 7

What country is Sophie Germain from?

Select one:

- a. The United States
- b. France
- c. England

Question 8

She lived in the ---

Select one:

- a. 1600s
- b. 1700s

c. 1800s

Question 9

Sophie first become interested in mathematics when she ----

Select one:

- a. read about a mathematician
- b. talked to her father
- c. learned to read

Question 10

Why was it a problem for Sophie to study mathematics?

Select one:

- a. Girls from the middle -class didn't study at that time
- b. Her parents didn't have enough candles
- c. Her parents didn't have enough money

Question 11

When did Sophie study?

Select one:

- a. all the time
- b. after school
- c. at night
